

## LABORATORY SUPPLIES TO ORDER

You must order the items provided in this list from Amazon. I have tested the items listed below and know they will work as required for the experiments we will be completing in this class. If you do not order the required materials as listed below, it could negatively impact your performance in this course and your safety while completing experiments.

I have provided a link to each item on Amazon below the image of the item. This will make it easier for you to order your lab supplies.

**PLEASE NOTE:** I have provided images, descriptions, and a link to the items you need to order below. The prices illustrated in this list may not be the same as those listed on Amazon since they often fluctuate. I have tried to find the lowest price possible for the necessary lab supplies.

Order **one (1)** of the two following safety goggles. These are to be worn AT ALL TIMES while working on experiments.

Click [HERE](#) to access this item on Amazon.

If you are an Amazon Prime Member, then you can receive free shipping on items that qualify. If you are not a prime member, you get can a free 6-month students membership by clicking [THIS](#) link.

Prices listed above may vary from those on Amazon. The total cost of your order before tax and shipping is estimated between \$70 and \$90.

**PLEASE NOTE:** This is just the basic laboratory equipment you will need to complete the labs in this class. This does not include other chemicals or household items you may also need for the experiments we complete in this course. Please see the top of each experiment for a full list of supplies and chemicals needed.

These required laboratory materials should be ordered before the end of the Module 1 (the sooner the better) and need to be received before the start of Module 3. I will not grant extensions because you did not have the required supplies to complete an experiment, so plan ahead.

If you are unable to find any of the items listed above, please contact your instructor immediately for assistance. I can help you find a replacement that will meet the needs of this class.

If you have any questions about these items or this course, please contact your instructor.
